CERAMIC ON THE RIGHT SPOT!
Ceramic precision balls are available in various materials and dimensions. Precision balls are applied in several products, such as valves, ball bearings and in measuring equipment. Ceratec holds a large stock of precision balls, ready to supply.

**CHARACTERISTICS OF THE CERAMIC PRECISION BALL**
- high tolerances
- smooth surface
- extreme hardness
- high load capacity
- low weight
- low cost, high quality

**INDUSTRY**
- pump
- chemistry
- petrochemistry

**MATERIAL**
- aluminum oxide
- silicon nitride

**APPLICATION**
- dosing
- sealing
